## About It

## Included in Kit

### Join-A-Jig

Wood Joining System.

The hardened zinc drill guides are the “core” of the Join-A-Jig. As you drill the pocket holes the Step Drill Bit follows these guides at a precise angle calculated to provide optimal joint strength. The Drill Guide can be used in the Join-A-Jig or can be removed and used for repairing existing joints.

1

### Mini Join-A-Jig

Mini version of Join-A-Jig Wood Joining System. it good for Hard-to-reach jobs places.

1

### Step Drill Bit (with Collar)

The Step Drill Bit drills a flat-bottomed pocket hole and the stepped tip drills down further to create a pilot hole for the Join-A-Jig Screws.

1
