

The Renovator Mini Join-A-Jig

The ideal tool for making strong joints off-site. Make repairs in hard-to-reach places: cabinetry, draws, furniture.

The Renovator Join-A-Jig Step Drill Bit

3/8" hex shank step drill bit snaps directly into quick-change chucks.

Industrial design eliminates slippage and optimizes drilling power.

Includes Allen key and depth collar.

The Renovator Join-A-Jig Square Drive

150mm (6") driver – the most practical Square Drive length. 6.35mm (1/4") shank.

The Renovator Join-A-Jig 50x Pocket-Hole Plastic Plugs

These plugs can also be used to decoratively accent pocket holes on painted or laminated material. Simply snap them in and you're done.

The Renovator Join-A-Jig 32mm Zinc Screws (100 pk)

Zinc-coated for corrosion protection and are engineered to not break or split the timber.

The large washer head sits firmly in the bottom of the pocket hole for maximum joint strength.

The self-tapping tip drills its own hole in the second workpiece as it is driven, so even the hardest wood, such as hickory and oak, does not split.

The Renovator Join-A-Jig 32mm Stainless Steel Screws (100 pk)

Zinc-coated for corrosion protection and are engineered to not break or split the timber.

The large washer head sits firmly in the bottom of the pocket hole for maximum joint strength.

The self-tapping tip drills its own hole in the second workpiece as it is driven, so even the hardest wood, such as hickory and oak, does not split.

The Renovator Join-A-Jig 51mm Zinc Screws (50 pk)

Zinc-coated for corrosion protection and are engineered to not break or split the timber.

The large washer head sits firmly in the bottom of the pocket hole for maximum joint strength.

The self-tapping tip drills its own hole in the second workpiece as it is driven, so even the hardest wood, such as hickory and oak, does not split.
